

The Energy Conscious.com

“My money, my planet”

Dear Property Managers, Energy Auditors and Builders,

Nearly half of all the energy used in our homes is wasted. According to the Department of Energy, the average home in the U.S. spends \$5,500 a year on energy. This means that we have the potential to save as much as \$2,250 a year without sacrificing too much. A waste reduction will also go a long way to protect our environment for future generations.

At www.TheEnergyConscious.com we offer energy efficient and water saving products that will substantially reduce your energy and water bills. Many of the products we sell entail very little upfront expenditure compared to the generated savings. One such product that will pay for itself in one year or less is the [Attic Tent®](#).

We all know that the attic is one area of the house that wastes energy in both cold and warm temperatures. Both cold and heat seep through the attic many holes to the main area of the house causing the air conditioner or the furnace to work much harder than they need to. Since "heating and cooling" makes up almost half of your home energy spending (according to the Department of Energy), installing an **Attic Tent®** will **drastically** reduce air transfer in and out of the home (by up to 71% according to independent appraisers. For more see our website).

The **Attic Tent®**:

- Greatly reduces your energy bill
- Reduces health risks from attic dust
- Installs very easily. As easy as 1-2-3
- May qualify for Federal Tax Credit (Up to 30%)*
- Is Attractive looking

The **Attic Tent®** comes in 7 different sizes. Please measure your attic before deciding on which Attic Tent® to purchase. For measuring instructions please [click here](#).

Thousands of homeowners have purchased **The Attic Tent®** and will enjoy its benefits for years to come. Check some of the testimonials of satisfied clients [here](#).

We stand ready to provide you with attractive pricing for your volume purchases. You can call me directly at 888-4056064 or e-mail me at

Sincerely,
Nabil Estefan
